

## ***Installation Guide:***

1. Run **setup.exe** from installation package.
2. Follow installation and select your desired working drive as the path for installation. Better to not use windows installed drive.
3. Install **pdf24-creator-6.2.0** from installation package
4. Run **VisualBasicPowerPacksSetup** from installation package
5. Run executable icon of **ARCO** () which is in your desktop or in the path you gave before while installation.
6. If application doesn't work, you may need to set it '**Run this program as administrator**'.
7. If you don't have ACCESS, run one of the following files according to your windows 32 or 64 bit:
  - For Windows 64 bit: **AccessDatabaseEngine\_x64**
  - For Windows 32 bit: **AccessDatabaseEngine**
